DEENAR
LIFT COMPANY

Karachi’s Trusted Lift Specialists

At Deenar Lift Company, we deliver reliable elevator solutions designed to meet the needs of modern residential commercial, and industrial buildings across Karachi. As a trusted provider of imported and semi-imported lifts, we specialize in elevator installation, maintenance, modernization, and repair services.

Intelligent Main Control System

The specialist diagnostic system can automatically diagnose and display the cause of faults and store information.

Its self diagnosis function makes operation and maintenance more convenient.

info@deenarliftco.com.pk

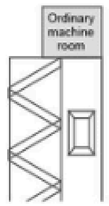

SMALL MACHINE ROOM PASSENGER ELEVATOR

Unique small machine room design, using compact dense permanent magnet synchronous geartess traction machine and special design of control cabinet. Reasonable civil engineering lnyost can acheve the same size of machine room area and shat, reduce the height of machine room, improve space utilzation, and make the bulding elegant and beautitul..

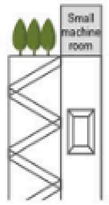

Machine room is only extension of well.
It needs no other space.

It saves the building area and
enhances the design freedom.

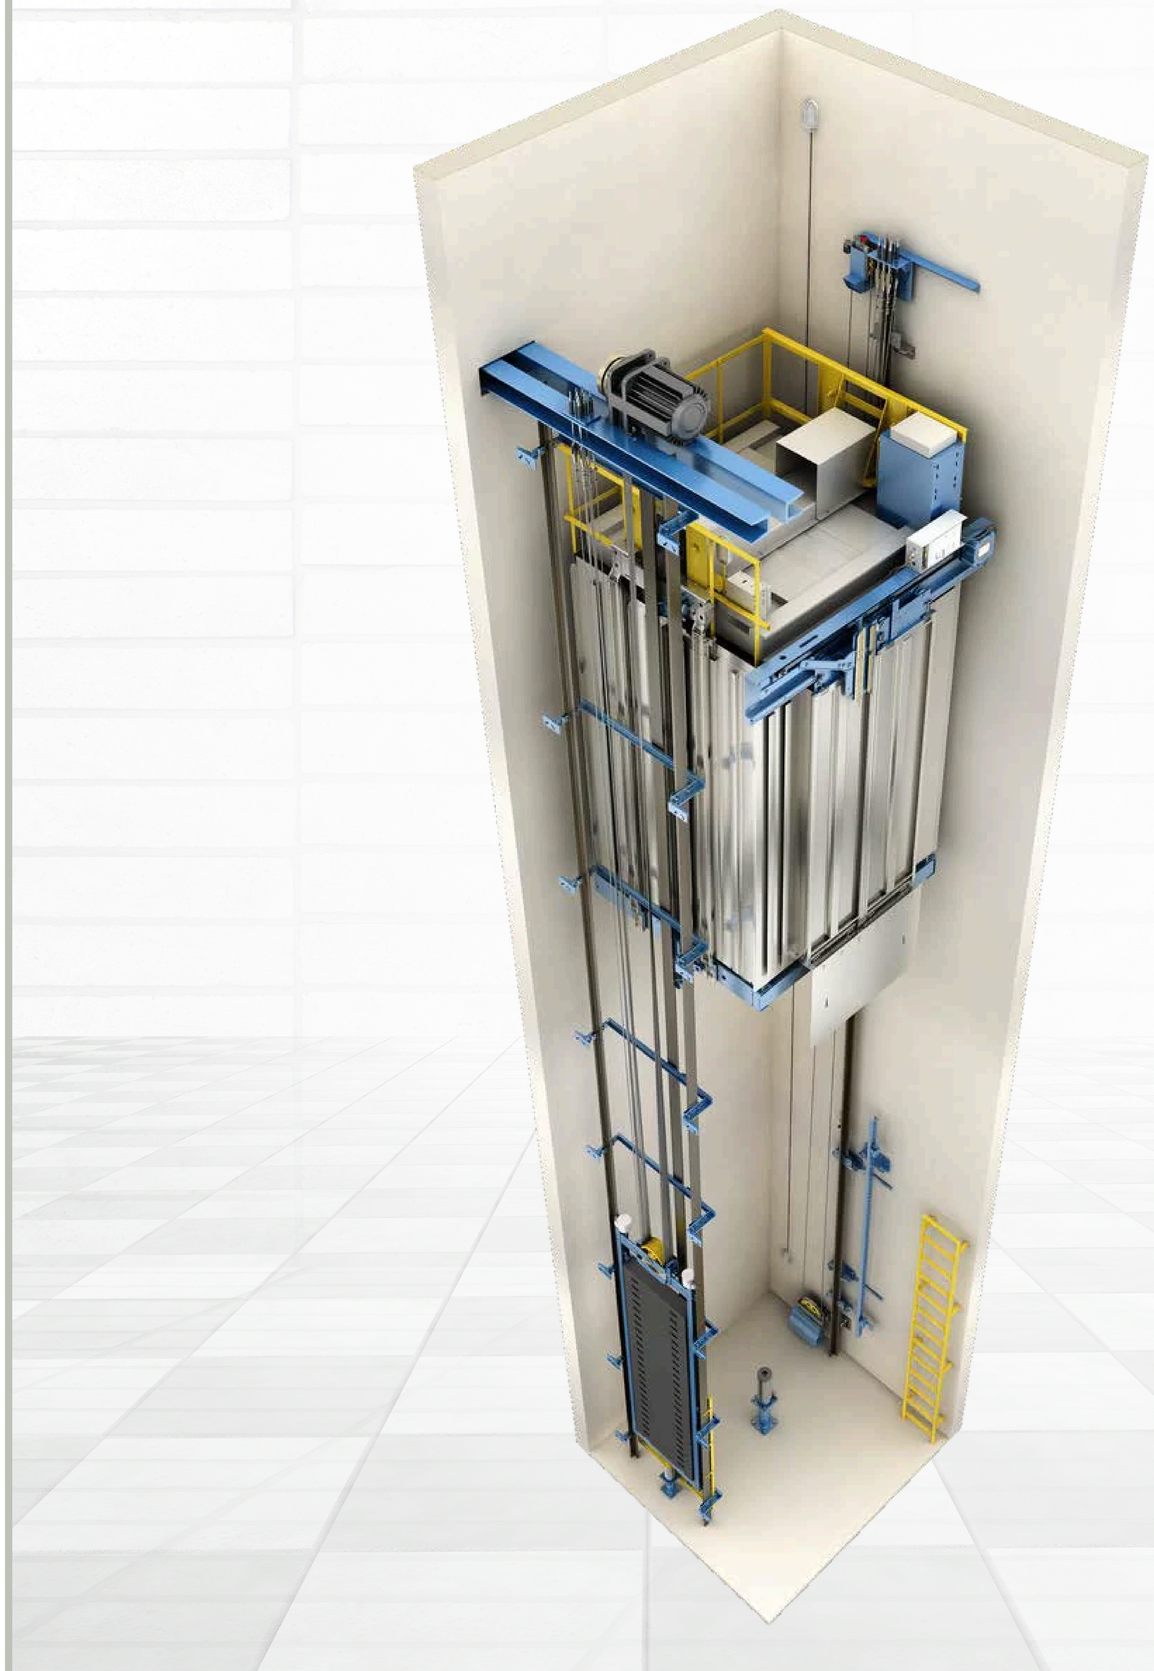

It applies the advanced energy-saving technology.
It can fulfill about 30% of energy-saving effects.

of small elevator

MACHINE ROOMLESS PASSENGER ELEVATOR

Machine-room-less elevator series resolves the restriction of the elevator to the building construstion, reduces cost, improves space utilization, and provides more possiblities for designers. Saving the space and cost at the same time, it provides the passengers with upper level intellectual, effective and stable travel.

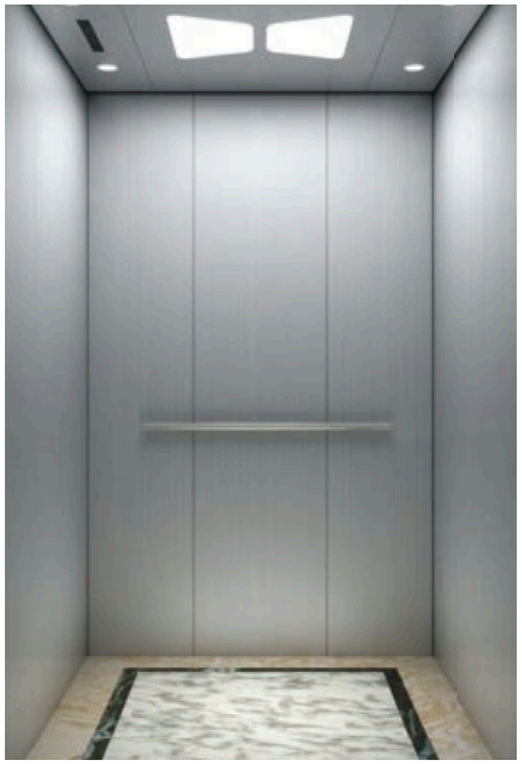

Optimized well design effectively saves 10% the building area.

Green drive and energy saving device save about 30% of energy.

Machine room less design brings about a freer and more relaxing building design.

PASSENGER ELEVATOR CAR DECORATION

DLC-001

Celing: Hairine stainless steel, acrylic lighting decoration LED downlight

Car wall: Hairline stainless steel

Handrail: Hairtine stainiess steel singel tube

Floor: PVC

DLC-001

Celing: Hairine stainless steel, acrylic lighting decoration LED downlight

VILLA ELEVATOR

elevator can let you eric the comfort. The - frequency convention system precisely controls the elevators running enhances me comfortable experience in various directions. tow noine, masy instatation. wonderful home environment. Not only save design and comtruction cost of the machine but also make use of your bulding. small footprint, safe and relable, which will be Precision for you to think of.

CHOICE
INTERNATIONAL QUALITY

1 Steel-band traction machine

Adopting advanced permanent magnet synchronous gearless traction host, low noise, low vibration, and stable operation; No need for lubricating oil, energy-saving and environmentally friendly. The brake with upward overspeed protection function ensures safer operation.

3 Steel band

Polyurethane material layer, without lubrication, has a lifespan that doubles that of traditional steel wire ropes: easier to bend, more energy-efficient, and more efficient

5 Safety gear

One of the protective devices that comply with the national type test certification and activate emergency braking to ensure passenger safety when the operating speed of the elevator exceeds the set limit or the suspension rope breaks or relaxes.

2 Control cabinet

Adopting high-performance intelligent vector variable frequency control technolo gy for elevators, combined with advanced algorithms such as motor vector control and smooth curve calculation, to ensure comfortable, stable, and intelligent elevator operation

4 Buffer

One of the multiple safety protection devices for elevators, it can maximize the absorption of abnormal impact energy and reduce the risk of elevator fall safety.
Guide Shoe

6 Car

Adopting galvanized sheet body riveting process instead of welding process, which is safer, more reliable, energy-saving and environmentally friendly, Low noise and comfortable operation

Traction type traction machine

Adopting advanced permanent magnet synchronous gearless traction host, low noise, low vibration, and stable operation; No need for lubricating oil, energy-saving and environmen- tally friendly. The brake with upward overspeed protection function ensures safer operation.

Wire rope

Through the dedicated fatigue life test of elevator steel ropes, it meets national standards and uses specialized friction grease with a certain friction coefficient, which has a long service life, safety, and reliability.

Guide Shoe

Adopting polymer high wear-resistant compos ite nylon material, it has strong wear resistance and good comfort

Gantry frame

Using finite element analysis to ensure a safer and more stable cabin.

Safety gear

One of the protective devices that comply with the national type test certification and activate emergency braking to ensure passenger safety when the operating speed of the elevator exceeds the set limit or the suspen sion rope breaks or relaxes.

Speed limiter

It is one of the protective devices that meets the national type test certification. When the operat ing speed of the elevator exceeds the set limit or the suspension rope breaks and relaxes, it will act in conjunction with the safety gear, emergency braking, and ensure passenger safety.

Control cabinet

Adopting high-performance intelligent vector variable frequency control technology for elevators, combined with advanced algorithms such as motor vector control and smooth curve calculation, to ensure comfortable, stable, and intelligent elevator operation.

Door machine

Adopting the most advanced AC permanent magnet and WWF variable frequency control technology, it operates safely, comfortably, with low noise, and stable and reliable performance.

Landing door

The door lock has passed 1 million life tests and obtained CE certification, while the landing door has passed the 45KG pendulum impact test, ensuring safety and durability.

Counterweight

By calculating the balance coefficient in accordance with national standards, it ensures that the weight and payload of the car are balanced, reducing energy consumption and motor power loss.

DUMBWAITER

It deducts safe, mute, steady cautious travel

DEENAR dumbwaiter elevator provides small freight elevators in various buildings with the prompt, economical and convenient vertical transport. It greatly saves time and labor resources. It is widely applicable for delivering food and drinks, dining ware, daily commodities etc. in the hotel, restaurant, bank, hospital and so on.

Rich specifications and models

Load range: 100kg-300kg. Door modes can be divided into windowsill type for direct entry/exit of the goods and floor type for delivery carts.
